

Make No Mistake

MAKE SURE YOU'RE READY FOR

PATIENT WRISTBAND COMPLIANCE

with **HP** and **LaserBand®** solutions

MAKE A GOOD CHOICE for your patients

With the NPSA estimating that 2,900 patients a year have been given the wrong care because of confusion over wristbands, mostly due to a failure to use them, the new guidelines will make a significant impact on patient safety.

As the only NHS-contracted supplier of laser printed ID, LaserBand and HP's Patient identification solutions will help you to:

- Improve patient safety. Colour photos and/or bar codes can be incorporated into wristbands and warning codes for allergies, DNR and fall risks can be pulled directly from patient records.
- Streamline steps in the admissions process to reduce the wait time to appropriate medical care.
- Improve patient care when administering medications, pulling lab work, assessing specimens, delivering test results and during operations by scanning barcodes at the time of procedures.

HP and **LaserBand** are committed to helping hospitals and other medical facilities develop NPSA-compliant imaging and printing

Call XMA's dedicated Health Team today on **0115 846 4889** or visit **www.xma4health.co.uk**

“Patient wristbands are a vital part of verifying patient identity, but compliance is essential if they are to be used effectively.”

Department of Health Publication 'Coding for Success'.

MAKE COMPLIANCE YOUR GOAL

HP Patient Identification solutions complemented by LaserBand wristbands and labels can support your compliance to NPSA guidelines in all respects:

- Size (adult, child, infant, bariatric)
- Comfort (shape, soft/smooth edges, fastening, hypo-allergenic material)
- Usability (easy to clean, waterproof, alcohol-proof, secure, patient can wash)
- Method for recording patient identifiers (generates from hospital system, easy to read, durable)
- Information presentation (ample space to record patient info)
- Colour (Black on white preferred, red is acceptable too)
- New technology (needs to support future technologies e.g. bar-coding, RFID, etc.)

For compatible HP printers call XMA's dedicated Health Team today on **0115 846 4889** or visit **www.xma4health.co.uk**

MAKE HP your choice

HP has a strong track record of delivering imaging and printing solutions to the healthcare industry. It offers a single hospital portfolio of printers and multi-function printing solutions including devices to print onto LaserBand wristbands.

This portfolio can support all areas of a hospital administration from back office through to clinical and admissions environments.

About LaserBand

LaserBand is the leading global provider of laser-printed patient identification wristbands.

The inventor of the self-laminating wristband, LaserBand helps hospitals meet patient ID requirements using any technology, from handwriting and embossing to bar-coding (thermal or laser printed) for easy implementation and minimal workflow changes.
